

Radio Vest

Made in USA
of US and foreign components

USE

The CMC Radio Vest holds two radios in a balanced, weight distributing, easy-to-don design. Adjust the web through the buckles at the front and sides for best fit and comfort. The hook-and-loop strap at the upper back can be adjusted to provide the most comfort of the shoulder strap position.

To adjust the radio pocket for proper fit to the body of your radio, insert the included tongue depressor (or other flat surface) in between the 3/4" bottom strap and 1-1/2" backing web to separate the hook and loop surfaces. Adjust for the proper fit to the radio with the plastic buckle just above the top edge of the pocket. Remove the tongue depressor and check to make sure the bottom strap is secure.

Use the flat pockets on the inside of the vest panels to store pens and a notepad.

CARRYING, MAINTENANCE & STORAGE

During use, carrying and storage keep the equipment away from acids, alkalis, exhaust emissions, rust and strong chemicals. Do not expose the equipment to flame or high temperatures. Carry the equipment where it will be protected as the equipment could melt or burn and fail if exposed to flame or high temperatures.

If the equipment becomes soiled, it can be washed in cold water with a mild detergent that is safe for use with nylon and polyester. Dry out of direct sunlight. Do not dry in an automatic dryer. Store in a cool, dry location. Do not store where the equipment may be exposed to moist air, particularly where dissimilar metals are stored together.

REPAIR

All repair work shall be performed by the manufacturer. All other work or modifications void the warranty and releases CMC from all liability and responsibility as the manufacturer.
