### **IMPORTANT INFORMATION - PLEASE READ AND SAVE**

# WATERPROOF RADIO HARNESS

Made in USA of US and foreign components The CMC Waterproof Radio Harness system secures an Aquapac<sup>™</sup> radio bag to the CMC Radio Harness. The radio bag is intended to provide protection during swiftwater/flood rescue operations as well as from splashes, rain or back spray from a fire hose. It is not intended for dive operations. While the Aquapac bags have an excellent reputation, the following suggestions will help protect your radio equipment:

- Make sure that the bag is properly closed and sealed before commencing operations. Follow the instructions provided by Aquapac.
- If possible, use older or "replaceable" radios for water operations.
- Use with caution and continue to evaluate the security of the seal as conditions warrant.

The CMC Waterproof Radio Harness utilizes a harness system similar to that on our standard radio harness. The harness works best if positioned high on the chest. As much as possible, the straps on the back should be positioned like a "V". Use all of the adjustment points to best position the radio. Make sure that the straps holding the radio bag to the chest harness are secure.

## 

When used during swiftwater operations, the harness system on the CMC Waterproof Radio Harness can create a snag hazard. CMC recommends that the harness be worn under the PFD or used without the harness to reduce this risk.

All water rescue operations should be performed by trained and experienced personnel only.

#### **CARRYING, MAINTENANCE & STORAGE**

During use, carrying and storage keep the equipment away from acids, alkalis, exhaust emissions, rust and strong chemicals. Do not expose the equipment to flame or high temperatures. Carry the equipment where it will be protected as the equipment could melt or burn and fail if exposed to flame or high temperatures.

If the equipment becomes soiled, it can be washed in cold water with a mild detergent that is safe for use with nylon and polyester. Dry out of direct sunlight. Do not dry in an automatic dryer. Store in a cool, dry location. Do not store where the equipment may be exposed to moist air, particularly where dissimilar metals are stored together.

#### REPAIR

All repair work shall be performed by the manufacturer. All other work or modifications void the warranty and releases CMC from all liability and responsibility as the manufacturer.
